

# Pluggable terminals and blind inserts for DR16 – DR70

**Frame Inserts** with cutout for commercially available pluggable terminal blocks.

## Features:

- Used as assembly and guide element for the PC board with guides for transverse board and longitudinal board offset by 90°.
- Compact design for secure snap-on and safe fixing on the base part.
- Screw-on option for the cover.

Frame insert with top cutout for separate pin header for maximum component space on the longitudinal board.

Connection of commercially available screw-plug connectors.

**Frame insert with top cutout** for separate pin header. You will have the maximum component space on the PC board.

**Frame insert with bottom cutout** allows the assembly of a transverse board.

**The blind insert** provides for the full covering of the base part. Individual customized cutouts achieved by mechanical machining or special tool inserts are easy to be realized.

## TECHNICAL DATA:

<b>Material of plastic parts:</b>	PC UL94 V0
<b>Color:</b>	Black Special colors on request
<b>Temperature range:</b>	-40°C up to +110°C
